Name	Dhani
Gender	Male
Date of Birth	14-April-1954
Time of Birth	xxxx (hospital birth certificate)
Place of Birth	Brooklyn, New York, USA

Namaste **Dhani** :

It is important to appreciate that gems do not possess 'magical' powers, and superstition toward gemstones is not warranted. Flawless gems, which are properly energized by mantra and positive intention, have a "signal-repeater" capacity similar to a radio crystal.

HOW JYOTISHA GEMSTONES WORK

Positioned at sensitive points along the body's psychic nerve system, gems can strengthen and repeat the higher thoughts which one is consciously or unconsciously thinking and believing. the nature of the thoughts and beliefs which one holds are critically important to getting successful results from wearing a flawless gemstone.

Each person is born with a 'default' set of beliefs and expectations. Each graha represents an area of belief.

1. Surya plays out beliefs about divine creativity and intelligence.
2. Chandra projects beliefs about being cared for and belonging in a place.
3. Mangala expresses one's subconscious expectation regarding movement and vitality.
4. Budha articulates beliefs about one's communication and inner thoughts.
5. Guru expresses deep convictions about abundance and expansion.
6. Shukra carries out beliefs about pleasure and wealth.
7. Shani manifests beliefs about material survival and safety.
8. Rahu expresses expectations about excitement and desire
9. Ketu carries out beliefs regarding spiritual detachment.

REJUVENATION AND POSITIVE CHANGE

Each graha rules a particular *amsha*, receives drishti, and has other specialized characteristics which determine the beliefs and expectations that the native will carry into this life. With sufficient spiritual attention, these thoughts are fully capable of rejuvenation and improvement at the source.

However, most people will operate with an essentially unchanging, repetitive, habitual set of inborn subconscious expectations, throughout their busy lives.

Gem prescriptions are made on the presumption that the karma of habitual thought and belief will remain largely unchanged during the person's life. However, it is important to appreciate that this karma (the mandate to act and react) can be changed through reflective intention at any time.

Nevertheless, the compulsion toward repetitive, culturally-reinforced thought is so strong that most people indeed do not take the initiative to change it. , for better or for worse, gem prescriptions based on the condition of the planets at birth do tend to be quite accurate.

PHILOSOPHY OF GEM PRESCRIPTION

There is a school of Jyotisha practice called “pratikula” which philosophizes that strengthening a naturally malefic graha is an effective method of reversing its karma. I do not agree with this school of thought. My understanding is that the remedial power of gemstones consists in the ability of a pure, flawless, non-heat-treated gem to conduct and amplify our subconscious expectations.

Our most subtle thoughts are very fine-granulation. We are not normally even aware that we are repeating a pattern of thoughts and expectations constantly, day-in and day-out. However this subtle pattern of imagery and instruction is going on all the time.

The power of the gems is to pick up these subtle thoughts, similar to the way a radio crystal picks up a radio signal. The flawless gemstone then amplifies the signal so we can hear it clairaudiently, as a voice of “intuition” or inner counsel.

Each graha has its own program of thoughts and instructions carried over from past lives into the current life. I believe it is beneficial to strengthen the instructions which come from

subha-graha, but it is never beneficial to strengthen the instructions which are emitting from the papa-graha.

WEAK BENEFICS ONLY (*Anukula* Method)

My gem prescription policy = *Anukula* method = to **strengthen weak natural or temporal benefics only**.

If a graha has the dharmic qualities of a trine lord (1, 5, or 9) the traditional rules of Jyotisha suggest that under appropriate circumstances (proper intention, proper energizing of the gem, and correct timing of application) a gem can help strengthen positive outcome from the good thoughts which guide the action of the graha action in this lifetime.

Let's have a look at the graha in your kundali, Dhani , to determine which gemstones might be beneficial for you.

SEVA

- Jyotisha remedial ratna are generally expensive, due to world marketing of ornamental luxury gems.
- Therefore it may be advisable to choose a path of Seva in preference to using gems, at least until one has acquired sufficient wealth to justify a gem purchase.
- Seva is always effective for improving the intelligence and transforming ignorance into wisdom.
- For graha that do not qualify for remedial gem application, offering Seva consistently as a form of self-education will correct all planetary deficiencies. And Seva is free!

QUALITY AND HANDLING OF GEMS

Flawless gems are expensive and hard to find. Consult a trusted Vedic-trained gemologist. It might be easiest to start with a single gem of modest size, and combine the recommended ratna as your finances allow.

For all remedial gemstones, be sure to cleanse the stone energetically with extreme attention to proper mantra.

According to Dr. G.S. Kapoor in *Gems and Astrology* (1994, p 91)

“It is very important for all gem stones that before wearing them they should be kept immersed for sometime in unboiled milk or Ganges water.

Afterwards the stones should be worshipped with flowers and incense, and the Mantras of the planets should be recited 108 times.”
